**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a sense amplifier for a ferroelectric memory device. The independent claims 1 and 10 recite sensing circuit for sensing an electrical charge stored in a capacitor element comprising a charge integrator circuit receiving an electrical charge from a capacitor element, and a discriminator circuit coupled in series with the charge integrator circuit, the discriminator circuit having a first input arranged to receive an output signal from the integrator circuit and a second input arranged to receive a reference voltage signal. The PRIOR ART fails to disclose or suggest such a sensing circuit for sensing an electrical charge stored in a capacitor element comprising a discriminator circuit coupled in series with the charge integrator circuit wherein the discriminator circuit has a first input arranged to receive an output signal from the integrator circuit and a second input arranged to receive a reference voltage signal such as described in the independent claims 1 and 10, therefore, claims 1-21 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571)272-1871. The examiner can normally be reached on M-F (7:00-3:30).
